## **PROTECTOR PTE 70** **EURO PROFILE CASING WITH TURNSNIB INSIDE &** **EMERGENCY RELEASE OUTSIDE.**

**Suits All Locks & Latches Featuring Standard  
Europrofile Cylinder Aperture.**

**The PTE 70 is another innovative product from LDH.  
The PTE permits the use of a full-size mortice lock (such as Protector 735 & 8500) and is particularly useful where the security requirement changes. For example, generally a bedroom or office may require only the privacy function but when parents are away and access is to be denied the PTE can quickly be changed for a keyed cylinder.**

**Standard PTE Length is 70 mm  
Finishes: PB, SCP, CP**

.....  
**LDH stocks an extensive range of Cylinders in both  
Euro Profile and Oval.**

**We have an “off-the-shelf” range of Extended Euro Cylinders (90, 100 & 110 mm) and  
Extended Oval Cylinders (54, 74 & 94 mm).**

**Cylinders of odd configuration made to order.**
